

Step by Step Walk through on How to create a strap for your mask using hair ties.  
Making one-hand mask application easier.

Materials: Mask and Hair Ties

Step 1: Loop One Hair Tie Through One Side of the Mask's Elastic Straps

Step 2: Bring both loops of the hair tie together, like a butterfly

Step 3: Loop each additional Hair Tie through the previous hair ties' two loops

Step 4: Tie the last hair tie in the chain to the elastic strap on the other side of the mask

Your mask now has a continuous strap, which can be used for placing the mask on your head using only one hand.
